

Commercial information and physical data

- It is mainly used in castings firm, sidewalks and roofs.
- Source: Limestone.
- Color: Gray.
- Classification: Chemical Sedimentary Rock.
- Structure: Trigonal or rhombohedral.
- Texture: fine to coarse granular bit scratchy.

The Mixed is composed of a portion of Gravel 2 and Sand 4

Chemical Information

Volumetric Weight and Grit

1.55 Tons X metro 3
-3/4" to fine

Fineness modulus

2.3 to 2.9
and 2.9 to 3.8
