

## Commercial information and physical data

- It is used for making block, blinds, castings firm and sidewalks, rustic plaster walls up.
- Source: Limestone.
- Color: Gray.
- Classification: Chemical Sedimentary Rock.
- Structure: Trigonal or rhombohedral.
- Texture: fine to coarse granular bit scratchy.

## Chemical Information

### Volumetric Weight and Grit

1.60 Tons X metro 3

1/4" a finos, con contenido de 5% en la malla 200

### Fineness modulus

De 2.9 a 3.8

### Chemical Analysis:

CaCo3	SO2	R2O3	MgO	S
95.77	2.0	1.0	1.2	0.03
